

## T1V Product Release Notes: January 22nd, 2020

### ***NEW FEATURES IN THINKHUB 4.7***

#### **CLOCK**

ThinkHub Clock is now available in standard ThinkHub. The ThinkHub Clock features three main capabilities: Timer, Alarm, and Countdown. Use these applications to get more done while managing effective meetings and brainstorming sessions. You can also leverage the clock tool for design and sprint planning or lean innovation.

#### **BROWSER DUPLICATE**

The ThinkHub Web Browser now features a built-in duplicate button, making it easy to duplicate a web browser URL on the Canvas. Use this feature to view multiple pages on a website at the same time, while your team adds notes

#### **MICROSOFT TEAMS**

Microsoft Teams joins the ranks of Skype For Business, Webex, BlueJeans and Zoom as a natively integrated video conferencing platform within ThinkHub. Accessible in the ThinkHub Menu, users can join an existing Teams meeting or create a new Teams meeting entirely. Participants will be able to view the ThinkHub Canvas, while in-room ThinkHub users will be able to view remote participants' screens and / or camera feed. Please contact your T1V Territory Sales Manager for pricing.

### ***IMPROVEMENTS IN THINKHUB 4.7***

#### **EMAIL - CONTACT LOOKUP**

The ThinkHub Contact Lookup feature has been optimized to increase the speed of searching your computer's address book. In addition, the search feature has been improved to recall the top ten results as you enter each character.

#### **IMPROVED ANNOTATION**

We've improved the speed and performance of annotating on the Canvas and Applications, making your experience smoother than ever.
