

## ThinkHub 5.2 Release Notes

Release Date: March 29 2023

Version: 8.02.01

### → New Features + Improvements

- ◆ New + Improved UI
  - T1V has updated its standard ThinkHub user interface featuring new artwork for the idle screen, an updated Canvas theme featuring a dark background, and refreshed iconography throughout the interface. The new look and feel is largely visual; there are no major shifts in overall layout and placement of key features and functions. The updates come primarily from user feedback and in an effort to more closely unify the user experience across the ThinkHub platform.
- ◆ Web Browser Suspend
  - Users now have the ability to pause and resume their live web browser windows in ThinkHub Room.

### → Fixes

- ◆ [ThinkHub MultiSite](#)
  - (SOF-4736) Fix to Canvas Map viewport location
