

ThinkHub 4.6 Product Release Notes

Release Date: July 23, 2019

THINKHUB SMARTGRIDS

ThinkHub SmartGrids are now available in standard ThinkHub. Use SmartGrids to create Canvas layouts to view and present content in optimal sizing and alignment. Once the content is dragged into the SmartGrid drop zone, the content will expand to the max size of the grid. SmartGrids is part of the ThinkHub alignment tool set, designed to aid users in better organizing and visualizing content on the ThinkHub Canvas. Plus, it makes for a powerful presentation tool when utilizing ThinkHub or any variation of ThinkHub, like ThinkHub xCanvas, to present highly visual content to teams.

THINKHUB MULTISITE VIDEO CONFERENCE

ThinkHub MultiSite now features built-in video conferencing, making your MultiSite meetings more seamless than ever. In addition to sharing a Canvas, MultiSite VC supports audio and video for ThinkHub MultiSite participants across up to ten connected locations at a time.

To enable MultiSite VC, current MultiSite customers can simply plug in a USB camera/microphone to their ThinkHub. When in the ThinkHub MultiSite session, participants can navigate to the Menu and toggle on 'Videoconference Mode.' Connected MultiSite VC participants will appear in a column on the right side of the Canvas.

THINKHUB MULTISITE SYNC

ThinkHub MultiSite Sync is another feature developed for our MultiSite customer base, now enabling sites to 'lead' MultiSite sessions by inviting other locations to sync with their current view. This ensures that all MultiSite locations - up to ten at a time - can view and operate within the exact same area of the Canvas at the same time. Locations can switch who is the lead throughout the MultiSite session, and each location has the ability to control who is 'Synced' and who is not.

THINKHUB AGILE - TEMPLATES

ThinkHub Agile Templates are now available for ThinkHub Agile users. Agile customers have the option to use T1V's standard Agile templates, which include Feature, Story, Capability, Retrospective, and Theme, or to work with T1V to 'design-your-own' Agile templates to adhere to your team's own workflow.

All Agile templates can integrate directly with Agile system of record software like CA Rally or JIRA. ThinkHub Agile users can upload/download CSV data files between their system of record software and ThinkHub, removing the need for someone to manually capture and update this information in two places.
